

# INDOSIT™ GA 3015

(High Strength Expandable Grout Admix)

INDOSIT™ GA 3015 is an expanding crystal modified high strength grout admixture for pressure/injection grouting. By introducing into the concrete mix, wet volume expansion and increased fluidity along with enhanced bonding, without segregation are produced.

## Uses

INDOSIT™ GA 3015 is used to increase cohesion in cement grouts (addition of sand is possible) and to develop non-shrink and high bond strength property. This product can be used for grouting of:

- Pre-stressed cable ducts
- Rock and soil anchoring
- Pre-placed aggregates
- Tunnel linings/ Concrete Slabs injection grouting

## Advantages

INDOSIT™ GA 3015 provides the following beneficial properties:

- Improved fluidity
- Increased cohesion; Increased strength
- Volume expansion in the wet state to develop non-shrink property
- Chloride free, does not attack re-inforcement or prestressed cables

## Dosage

.0.5 - 1.5% by weight of cement.

## Dispensing

Add directly to the cement/water mix in the mixer. Sand may be added if required.

## Packaging

500 Gm, 1Kg Pouch & 20 Kg Packing available

## Storage

Store under cover, out of direct sunlight and protect from extremes of temperature. Failure to comply with the recommended storage conditions may result in premature deterioration of the product or packaging.
